

Migration Immersion Day

What is a Migration Immersion Day?

Migration Immersion Day is an initiative that simulates an on-premises environment and allows customers to execute a migration to AWS. The migration flow is aligned with MAP best practices and includes steps from the Assessment, Mobilize and Migrate phases.

Benefits of a Migration Immersion Day

Migration Immersion Day is an intermediate level Immersion Day where customers can migrate to AWS by using a simulated on-premises environment.

Modules | Core

- Introduction**
 - Migrations overview
 - Migration Readiness and Assessment (MRA) overview
 - Migration Readiness & Planning (MRP) overview
